public impel me to make the following statements:

My college career, at New Haven, was interrupted by a severe cold which so enfeebled me that, for ten years, I had a hard struggle for hie. Hemorrhage from the bromchial passages was the result of almost every fresh exposure. For years I was under treatment of the ablest practitioners without avail. At last I learned of

Ayer's Cherry Pectoral,

which I used (moderately and in small doses) at the first recurrence of a cold or any clest difficulty, and from which I invariably found relief. This was over 25 years ago. With all sorts of exposure, in all sorts of climates, I have never, to this day, had any cold nor any affection of the throat or lungs which did not yield to Aver's Cherry Pictrorat, within 24 hours.

Of course I have never allowed myself to be without this remedy in all my voyages and travels. Under my own observation, it has given relief to vast numbers of persons; while in acute cases of pulmonary inflammation, such as croup and diphtheria in children, life has been preserved through its effects. I recommend its use in light but frequent doses. Properly administered, in accordance with your directions, it is

in any house. I speak earnestly because I feel earnestly. I have known many cases of apparently confirmed bronchitis and cough, with loss of voice, particularly among clergymen and other public speakers, perfectly cured by this medicine. Faithfully yours.

Gentlemen—Having beed annoyed with pimples, eruptions and roughness of the skin, from bad condition of my blood, for more than a year, I used a leading preparation of sursaparilia and other several released remedies to no effect. Then I consulted a prominent physician, and from his treatment received no benefit. I then concluded to try the 8.5 S. remedy for the blood, and five or six packages, by a thorough rendication of my trouble and restoring smoothness to my skin, have made me happy, and I cheerfailty give you this testimonial for such use and publicity as you wish to make of it.

THE DEGENERATED DERVISH

Description-Personal Appearance. As everywhere in Moslem countries, in Persia the dervish has degenerated. For-merly assimilating the noblest thought, the highest religious and political aspirations of which Islam is capable, the rank and file of the various religious orders comprised under the name of dervish is today composed of tramps and vagabonds of the lowest description. Many of them hall from northern India, and their type of features differs quite radically from that of the average Persian. There are Arabs among them as well, negroes from Africa, Koords, Turcomans and Afghans. All of them, however, of high and low de-gree, are "benghis," i. e., :mokers of "bengh" or hasheesh.

As to their appearance, one can indeed speak of it as a picture-sque raggedness, and, as a rule, they wear their rags with elegance. The outfit of one of these gentry is not very extensive. A more or less soiled and torn cottage garment, a tiger or bear skin slung over the shoulder (bedstead and mattress both), a long stick of generous dimensions, whose carved handle frequently forms the Arabic char acter for "ya ali," the horn of an argali, or mountain sheep to give notice of his approach to the benevolent); a hasheesh pipe and a "kaeshkull" (a cocoanut shell to receive his food in; these are about all
